Micro Gauffré
Doux et absorbant.

▼ Information produit

Article	12134
int. Nom	Tork Premium PT
nat. Nom	PH TORK PREMIUM 16/6rlx/21
Pays d'origine	Le Theil
Code douanier	48181010
Plis	2
Longueur:	24.8 [m]
Formats:	198
Longueur de format:	12.5[cm]
Largeur:	9.7 [cm]
Diamètre:	10.2 [cm]
Grammage	15.8 [g/m ²]
Type de fibres	Pure pâte vierge
Impression	No
Couleur	Blanche
Blancheur	82 [%]

▼ Spécifications du sous-conditionnement

Unités/sous-conditionnement	6
Poids brut	0.48964 [kg]
Poids net	0.4599 [kg]
Packaging	Plastic
EAN	7310791087658

▼ Spécifications du conditionnement

Packaging	Plastic
Nombre de sous-conditionnement	16
Longueur	800 [mm]
Largeur	400 [mm]
Hauteur	285 [mm]
Volume	0.0912 [m ³]
Poids brut	7.934 [kg]
Poids net	7.358 [kg]
EAN	7310791087665

▼ Spécifications de la palette

Conditionnements/palette	21
Couches/palette	7
Volume	1.915 [m ³]
Hauteur	2145 [mm]
EAN	7322540331028

Chemical pulp
Chemicals

Chemical pulp

Chemical pulp is produced either from softwood or hardwood. The wood chips are boiled together with chemicals and the major part of the lignin is removed. Chemical pulp is bleached in order to achieve a clean, bright and strong product, but also to increase the hygienic and absorbent qualities.

There are two major bleaching methods: ECF (elementary chlorine free) and TCF (totally chlorine free).

ECF is based on oxygene, chlorine dioxide and hydrogen peroxide. TCF is based on hydrogen peroxide and ozone.

Chemicals

Only process chemicals are used. Process chemicals are retention agents, creping agents, defoamers, coating agents, nutrients, pH-regulators, cleaning agents, releasing agents and flocculation agents.

No dyes are used.

This product is produced at Stembert mill, Belgium, and certified according to ISO 9001:2000 and ISO 14001.

This product is suitable to be taken care of in the normal sewage system of the community.
